## OBJECTIVE

---

Graduating student at Hanoi University of Science and Technology, self-taught developer with a strong background in Data Structures & Algorithms, fast learner, and independent thinker.

## EDUCATION

---

**Hanoi University of Science and Technology**  
Mechatronics Engineering

Graduate 2024

## SKILLS

---

<b>Front-end skills</b>	HTML, CSS, JavaScript, TailwindCSS, React.js, Redux, Next.js, Next-Auth.js
<b>Back-end skills</b>	Node.js, Express.js, MongoDB, Mongoose, TypeScript, Rest APIs, OAuth 2.0
<b>Problem-solving</b>	Strong in Data Structures & Algorithms
<b>Tools</b>	NPM, Vite, Git, Docker
<b>Language</b>	English (630 TOEIC)
<b>Others</b>	Linux, C++, Java, Object-Oriented Programming

## PROJECTS

---

**Shop punk.** A full-stack e-commerce store for technology goods. Features include filtering, rating, and purchasing products, and an admin role to create and update products, manage incoming orders, and view sales statistics.

- Tech stacks: React, Redux, TailwindCSS, Node.js, Express.js, MongoDB, Firebase.
- Developed only by myself. ([Try it here](#), admin account: admin2@email.com - pass: admin123)

**Messenger clone.** A real-time chat app where you can log in with your Google or Github account and start chatting with your friends. You can send messages or pictures and also create group chats.

- Tech stacks: React, Next.js, Next-Auth.js, TypeScript, MongoDB, Pusher, TailwindCSS, Cloudinary.
- Developed only by myself. ([Try it here](#))

**Cineverse.** A web application that provides information about movies, TV shows, and celebrities. It has features like filtering, sorting, and rating movies and TV shows.

- Tech stacks: JavaScript, React, Redux, TailwindCSS.
- Developed only by myself. ([Try it here](#))

**Weather app.** A public web application to get weather and weather forecasts of any city in the world by name.

- Tech stacks: JavaScript, React, Redux, openweatherAPI, rapidAPI.
- Developed only by myself. ([Try it here](#))
